• P1 (Priority 1) Cases are incidents in which Zend products are unusable resulting in total disruption of critical business processes.
• Customers can request that Zend expedite a fix for a specific PHP or Zend Framework bug that has been reported to the PHP or Zend Framework communities. Zend will make a commercially reasonable effort to fix this problem and deliver it as a hot fix. This will be done within the support time frame which is defined per product and version.
• Extended PHP Version Support Periods - Zend will continue to support and provide hot fixes for a PHP minor release for the specified time period after the minor release has been discontinued by PHP.net.
• Business Hours are Monday – Friday 8 a.m. – 6 p.m. EST in North America and CET in EMEA.

PRODUCTION SUPPORT SCOPE OF COVERAGE

Zend provides support for the following types of issues for all components shipped in Zend Server including the PHP runtime and Zend Framework:

• Installation
• Usage
• Problem Diagnosis
• Configuration
• Product Defects
• Upgrades

The following types of issues are not covered:

• Code development
• Code auditing
• Hardware or Operating System configuration
• Network design and configuration
• Security rules and policies
• Demos and examples

Standard Maintenance Updates

Zend provides periodic maintenance updates for all Zend components. This includes but is not limited to:

• PHP Runtime and PHP Extensions
• Database driver software and client libraries
• Apache
• MySQL
• Zend Framework
• Bundled applications (phpMyAdmin, etc.)

PHP Security and Critical Bug Hot Fixes

Zend provides periodic security hot fixes to customers. Some of these issues may have been fixed but not yet released by the PHP maintenance processes while other are newly discovered security vulnerabilities. Zend may also provide updates addressing serious PHP runtime or extension functional bugs.
